DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Keith Orum on March 2, 2005.

The application has been amended as follows: In claim 1 line 9 replace the word "when" with __where__.

Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach a terminal insertion hole provided in a feed connector provided in a brush holder where the engagement portion of a terminal engages a convex portion of the magnet holder of an electric motor as recited in claim 1.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mabuchi et al. 5,343,102 discloses a terminal 6 inserted into a terminal insertion hole located in a brush holder, but the Mabuchi et al. device does not disclose the terminal engaging the convex portion of a magnet holder and also the terminal insertion hole is not located in the feed connector portion of the brush holder.

Art Unit: 2834

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
